EXPERIENCE

Software Engineer / Cubet Techno Labs / Oct 2017 - Present

- Involved in architecting and building custom APIs for company's core projects.
- Published *ffmpeg-sdk* NPM package, which is a NodeJS wrapper for FFMPEG (multimedia processing software) that served as a core utility for an online dubbing studio project.
- Built chat engine for twitter that can handle multiple chatbots in a single NodeJS instance.
- Implemented text/audio chat using sockets for a realtime multiuser project.
- Worked on the serverless platform using AWS lambda / Firebase FaaS.
- Involved in most of the backend development cycles from project setup, DB design, server setup, application logic, documentation, testing and continues deployment.

PROJECTS

- VVOIZ - Online platform for dubbing**
Built all backend functionalities for managing users, roles, chat, dubbing flow, video and audio processing. Built NodeJS wrapper package for *FFMPEG* module.
NodeJS | MongoDB | ExpressJS | FFMPEG | Firebase | Socket | JWT | Swagger
- Total Parts Plus - Obsolescence Management Module**
Built backend functionalities for handling insertion and filtered view of data thats around million records.
NodeJS | ExpressJS | PostgreSQL | NodeMailer | XLSX
- BBCream - Dating and dining**
Built entire backend functionalities for authentication, chat, point system, cron jobs.
NodeJS | ExpressJS | MongoDB | Push Notifications | Firebase | Cron
- Alis - Conversational Assistant**
Built a chat engine that can handle multiple twitter chatbots at the same time.
NodeJS | Redis | ExpressJS | IBM Watson | Twitter SDK
- Termite - Survey platform for furnitures and surroundings**
Backend functionality implementation.
NodeJS | ExpressJS | Mocha | PostgreSQL
- Resto - Dining platform for upscale restaurants.**
Roles Integrated stripe payment system and point system for users depending on their activities and invitations.
NodeJS | Express | MongoDB | Elastic Search | Stripe
- YourCause - Grants Management for corporates**
Built workflows for managing grants and grantees
NodeJS | ExpressJS | MongoDB | Nodemailer

Software Engineer / Alt-s Solutions / May 2017 - Oct 2017

- Involved in building logic and dashboard for a CRM project.

PROJECTS

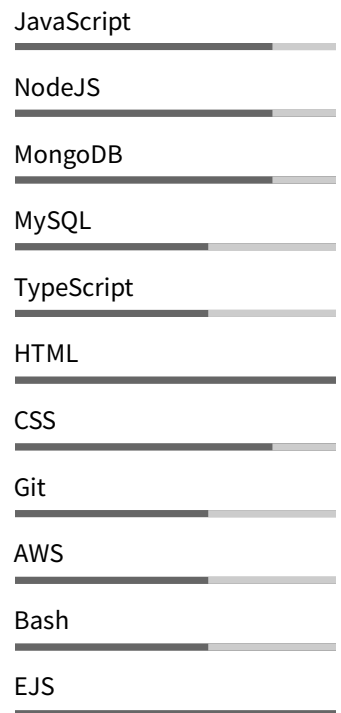

- MyOfficeBag - Online platform for dubbing**
Built analytics and reports using ChartJS and D3JS.
PHP | MySQL | ChartJS | Bootstrap

OBJECTIVE

Passionate software engineer seeking an appropriate position in an organization to grow and build modern applications for the web.
